all music sounds better on a

# WEBCOR

**NEW WEBCOR STEREO-DISKCHANGER WITH "MAGIC MIND."** This fabulous new diskchanger plays 33 and 45 rpm *stereo* or *monaural* records intermixed! Never before has any changer provided so many important advantages and features! Exclusive Webcor "anti-rumble ribs" absorb vibration for less rumble than any other record changer!

**NEW WEBCOR AMPLIFIER-SPEAKER SYSTEMS!** 1959 Webcor amplifier-speaker systems give up to 30 watts of audio power—team up to reproduce all sound with maximum clarity and precise definition!

**THE NEW WEBCOR "HIGH FONIC" FREQUENCY DISTRIBUTION SYSTEM** provides stereo fonograf reproduction unmatched in the industry! There's a thrilling experience waiting for each new owner as he listens to this glorious new music from Webcor's two sound systems. He'll hear sound as natural as the original with precisely the same values, dimensions and direction. The new "High Fonic" system makes it possible to use a smaller, compact external amplifier speaker system for the second sound source . . . rather than a large, space-consuming unit.

**NEW WEBCOR "AURAL BALANCE" REMOTE CONTROL!** When used with a Webcor Fonograf, this amazing unit allows the listener to balance and adjust audio levels in both sound systems from wherever he happens to be sitting. It adds convenience to the pleasure that is derived from stereofonic listening. The "Aural Balance" Remote Control can also be used with all Webcor Stereofonic Tape Recorders.
